

SOLUTION BRIEF

MANUFACTURING QUALITY MANAGEMENT

Capture information you need during a production process enabling an easy transition into digitally capturing data with customized checklists, alarms and reports

With Arcstone's solutions, gain better control over your processes with our Manufacturing Quality Management modules. Collect quality data, utilize alarms and alerts, predict abnormalities and create custom reports. Access all these features remotely via server, cloud, mobile, tablet or desktop.

Key Capabilities

Advanced Checklist

Comprehensive customizable checklist and forms system with capabilities for mandatory quality checks. Our mobile system allows defects to be photographed and annotated. Users can collect quality data through manual keying or automatically.

Alarms and Alerts

Triggers configurable notifications or updates to send to management/operators when there are delays or breakdowns during the production process. Notifications can be enabled for Telegram, Whatsapp, SMS and email

Anomaly Detection

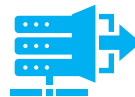

AI driven anomaly detection engine analyses in real time. Machine learning algorithms recognizes abnormal behavior, enabling early fault detection, potential breakdowns or quality issues

Configurable Reports

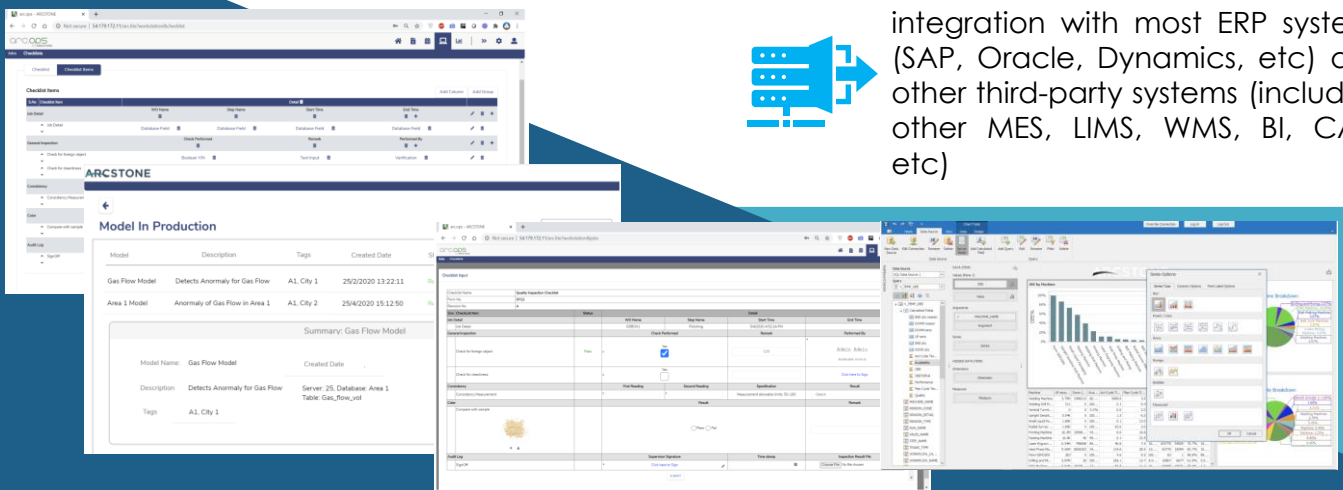

Note and record facility-wide issues and problems with custom write-up forms, images, audio and video for personnel to utilize for reporting. Easily customizable and configure the KPI calculations needed.

Integration with ERP & Third-Party Systems

Arcstone's arcFLOW enables integration with most ERP systems (SAP, Oracle, Dynamics, etc) and other third-party systems (including other MES, LIMS, WMS, BI, CAD, etc)
