

SOLUTION BRIEF

arc.lite™ LIGHT-WEIGHT MES

Powerful tool for SMEs to digitally monitor, control and optimize their production operations from day one at zero cost

Arcstone's arc.lite™ Free Light-Weight MES solution is designed specifically to give SME manufacturers a head start on manufacturing digitization by streamlining the heavy manual-based production processes to the fully automated ones at zero cost. Thanks to its intuitive, plug-and-play nature, the solution enables 1-day installation that allows manufacturers to significantly reduce time spent on deployment to rapidly optimize productivity and product traceability.

Our Solution

Offering core functionalities **for free** from scheduling, workflow creation to inventory management

Digitally tracking and recording of manufacturing time, personnel, resources and efficiencies

1 Day installation and flexible digital workflow setup

Digital and remote access on multiple browser-based devices

Comprehensive **reports and insights** for optimization, and data-driven decision making

Complete facility overview in one place

Key Benefits

With Arcstone's arc.lite™ solution, SME manufacturers will be able to experience:

Improved visibility into the production processes that enables higher resources utilization

Reduced operational cost thanks to the discovery and elimination of wasteful processes

Higher data security through the full ownership over data onsite or cloud instances

ARCSTONE

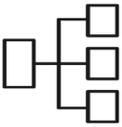

Valuable Functionality arc.lite™ Offers

Planning and Scheduling

Incorporates all of your scheduling, workflow creation and resources allocation into a single platform that optimizes your schedule to meet your business objectives

Digital Workflow Builder

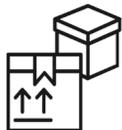

Automates facility wide workflows creation and management allowing for real-time monitoring of personnel, resources and equipment

Workstation Control

Enables to monitor and collect production data including step timing, QC, resources and personnel tracking in real-time through any browser-based devices

Inventory Management

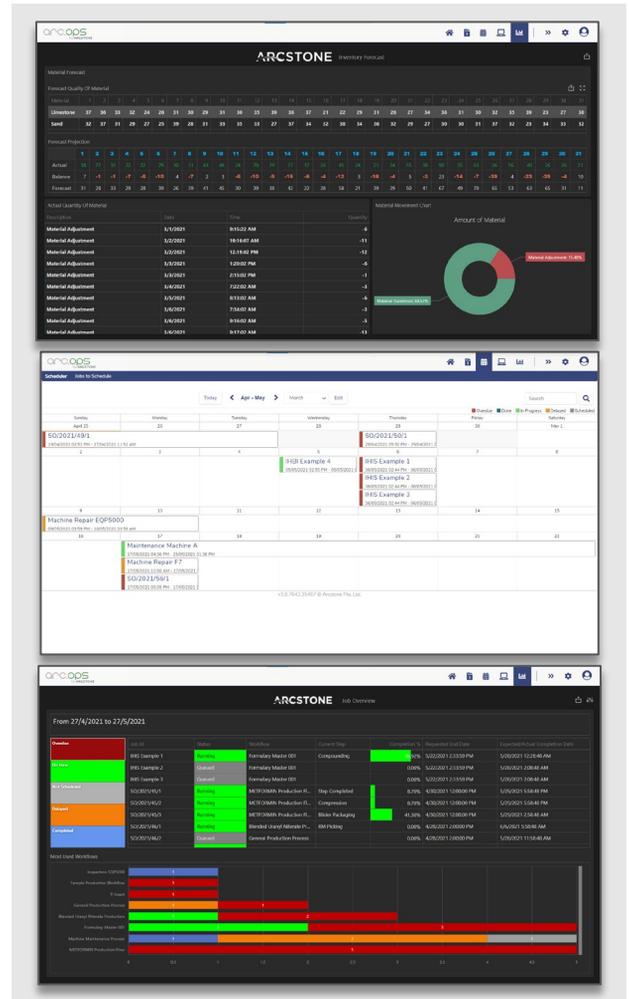

Real-time tracking of all raw materials utilization throughout the entire production processes from incoming inventory to WIP to finished goods, as materials are consumed

Equipment and Personnel Monitoring

Enables equipment and personnel tracking in real-time where data collected will be used for dashboard generation, monitoring and improvement

Dashboard Viewer

Generates a preset of dashboards from data collected and extracted insights for real-time view into facility wide productivity and resources utilization
